 Govt works areas

Govt would have key to emergency baggage

Most people don't lock their baggage
 but some times they left for airport

My company used only TSA to lock the key to the
 TSA (lock key) & Security Group

Another worker can get into the baggage lock

In our system if terrorist slipped and
 went to an already inspected baggage
 it would cause suspicion because
 the terrorist would have to slip the
 lock or otherwise break into the baggage.
 With a system now in use, checked baggage
 is vulnerable to key tampering and after
 inspection.
